

About Us

Mission Statement:

Our Vision and goal is to play an active role in the creation of purposeful structures which will enhance our environment and wellbeing. We want to help develop the dreams and ideas of people, companies, and organisations and in doing so be part of a team which creates facilities which will enhance the lives of others now and facilitate the development of future generations.

Company Profile

Pierce McGann & Company, Consulting Engineers was set up in August 1995. This practice is positioned to provide a hands-on approach to the structural design and construction of buildings, both commercial, private and public. With an emphasis on both quality of design and cost control every effort is made to providing a practical and cost-effective design solution for all our projects. This practice is founded on over twenty-six years of experience in the design and construction of small, medium, and very large projects.

Continuous Professional Development

We undertake continuous professional development courses as developed and supported by Engineers Ireland, and the Institution of Structural Engineers and Engineers Australia. The courses include Health & Safety Training, latest Design Efficiencies, structural design guidance to European Codes of Practice etc.
